NEIGHBORS ONLY PREVIEW · BRENTWOOD · NOV 4 TO 15

A preview guest, step by step

Invited neighbors only, one party per hour window, 4 to 9 PM (no 6 to 7).

1. **Know who's coming**

   The shared Google Calendar shows each visit at its hour: "Bar Preview: Kelly and Sam". If a second name is there, they're bringing a guest.

2. **They arrive**

   They have a ticket on their phone with their name, date and window. They tap **I'm here** and the ticket flips to "Coming right up". Greet them by name and seat them, plus their guest if they have one.

3. **Take the drink order**

   Any cocktail on the menu they like, on the house. Their guest too.

4. **Bartender redeems the ticket**

   Tap **Bartender: redeem**, enter the team PIN, set the number of drinks poured, tick the ID check (21+, valid government ID for everyone drinking). Tap **Redeem**; the ticket takes a stamp. One ticket, one redemption.

5. **Feed them**

   Their meal is on the house as well, for the guest and the person they brought.

6. **Send them off**

   They were hand-picked to see the bar first. Thank them for coming and invite them back.

Good to know. No ticket, no preview; walk-ins are not part of it. Guests can move their own time on the ticket and the calendar updates by itself. Questions on the day go to the manager, who has the backend and the PIN.
